

The old vs the New

What the old do not want the new to know.

1. The old have failed to accept change in there mine set on change.

When they walk into a room, they will change the people mine set.

2. When the new find this out they all now the old school have not changed their mine set.

No one should blame the plan, as some have made millions as a means to fund there wellbeing. The one that know this new that. The missing generation will understand that soon.

Otago and Southland have not changed, BUT today they will have to, accept, move on, and support the new order.

Put the new community boards in the correct electorate.

The middle ranks have made millions for no reason at all...poor rate payers....

That plan has not change but they all knew that.

They all need a MUM to cling onto and learn from, hope the new mayor his or her will stand for that?
