My/Our submission is *(include: whether you support or oppose the application or specific parts of it, whether you are neutral regarding the application or specific parts of it and the reasons for your views)*.

Opposed to dredging in the clutha river. The environmental effects are significant.  
\_\_\_\_\_

This dredge has two Detroit Diesel TWO STROKE main propulsion engines. The vessel has wet exhausts that mix the engine exhaust gas with engine cooling water that is then discharged directly into the river.

Detroit Diesel no longer manufactures these engines due to their negative environmental impact. They are no longer certified to operate in many parts of Europe and North America.

Two stroke diesel engines produce a lot more pollution due to the fuel air mix being contaminated by the engine lubrication oil.

These engines are used to manoeuvre the dredge every week for position changes and refueling.

They are simply not fit for purpose in an environmental context.
