TIM VAN WOERDEN, NATURAL HAZARDS ANALYST

Introduction

- ❑ ORC, with partners QLDC, DOC and Kai Tahu, are leading a project to develop a natural hazards adaptation strategy for the Dart-Rees area at the head of Lake Wakatipu

Project objective:

To provide a framework to actively manage risks associated with natural hazards for the resilience of the area located at the Head of Lake Wakatipu, including Glenorchy and Kinloch

Proposed Engagement

- ❑ First drop-in session tomorrow (Dec 4th, 2-7pm)
- ❑ Then three more drop-in sessions over next year

- 1. What is happening now, and how does this affect you?**
- 2. What could happen in the future, and what might we do?**
- 3. How can we navigate the adaptation options?**
- 4. What do the adaptation pathways look like, and what happens now?**

What is happening now, and how does this affect you?

- What do you value most in the natural environment of this area?
- What hazards and changes in the local environment have you experienced while you have lived here?
- What happened? What effect did it have on you and the community?
- What other things that are important to you were affected during these events?
- What are you concerned about in the future - are there any local hazards that worry you?
