**NOTICE OF WISH TO BE PARTY TO PROCEEDING PURSUANT TO
SECTION 274 OF THE ACT**

To: Registrar

Environment Court

Christchurch

1. Aurora Energy Limited (**Aurora Energy**), Network Waitaki Limited (**Network Waitaki**) and PowerNet Limited (**PowerNet**) (together **EDBs**) wish to be a party to the following proceeding: *Transpower New Zealand Limited v Otago Regional Council*, ENV-2024-CHC-35.
2. The proceeding relates to an appeal to the Environment Court on a decision on the Proposed Otago Regional Policy Statement (**PORPS**) made by the Otago Regional Council.
3. The EDBs submitted on the PORPS, including on matters subject to the proceeding:
 - (a) Aurora Energy Original Submission 0315 and Further Submission FS003153.
 - (b) Network Waitaki Original Submission 0320 and Further Submission FS003203.
 - (c) PowerNet Original Submission 0511.
4. The EDBs also have an interest in the proceedings that is greater than the public generally as jointly they supply electricity to all the homes, communities, business and emergency services in Otago:
 - (a) Aurora Energy is the largest network operating in Otago and supplies approximately 92,000 customers across two non-contiguous networks in Dunedin, Central Otago and the Queenstown Lakes District.
 - (b) PowerNet is a network management company which is contracted by OtagoNet Joint Venture to maintain and operate its network. That network is largely to the north and south of Dunedin, servicing

towns south from Waihola, Balclutha, Lawrence and Clinton, and towns to the north of Dunedin including Waitati, Palmerston, Macrae Mine and Ranfurly.

- (c) Network Waitaki serves customers in north Otago and parts of the Canterbury region with the network extending from the Mackenzie Basin around Omarama and Ōhau to Oamaru.
5. The EDBs are not a trade competitor for the purposes of section 308D of the Resource Management Act 1991.
 6. The EDBs are interested in all of the proceeding.
 7. Without limiting the generality of the EDBs interest, they have a particular interest in the following issues:
 - (a) Proposed new significant resource management issues for the region for infrastructure related issues.
 - (b) Coastal Environment: CE-O5 – Activities in the coastal environment.
 - (c) Energy, infrastructure and transport.
 - (i) EIT-INF-OF – Integration.
 - (ii) EIT-INF-P15 – Protecting nationally significant infrastructure and regionally significant infrastructure.
 - (d) Urban form and development: UFD-P3 – Urban intensification.
 8. The EDBs support and/or oppose the relief sought for the following reasons:
 - (a) The EDBs perform a critical function through the operation, maintenance, upgrade and development of the electricity distribution network. These networks provide the link between the National Grid operated by the Appellant and electricity consumers.
 - (b) Parts of the EDBs networks have been recognised as regionally significant infrastructure and all of the network is a lifeline utility for

the purpose of the Civil Defence Emergency Management Act 2002. Given the importance of this infrastructure, it is imperative that the PORPS recognise and provide for the ongoing operation, maintenance development and upgrade of the network.

- (c) The purpose of the PORPS is to achieve the purpose of the Act through issues, policies and methods which achieve integrated management of natural and physical resources of the whole region. As a consequence, it is important that regionally significant infrastructure and lifeline utilities be recognised as an activity which can occur be located in a range of environments.
- (d) Activities seeking to locate near the existing electricity distribution network have the potential to compromise the function of the network, foreclose opportunities to upgrade the network for the benefit of the wider community, as well as to create risks to the health and safety of people in close proximity to the network. The relief sought is supported to the extent that it recognises and protects against this risk.
- (e) The EDBs seek to ensure that the relief sought by the Appellant does not give rise to unintended consequences for the management of their networks in the region.
- (f) Electricity is essential for modern life. The PORPS does not adequately recognise the benefits of the electricity network to the environment, including the ability for people and communities to provide for their social, cultural and economic health and wellbeing. The relief sought goes towards recognising those benefits.
- (g) The EDBs oppose the relief sought to *EIT-INF-O5 Integration* as it would exclude recognition of the electricity distribution network. The EDBs understand the intention of the relief with respect to the National Grid, but are concerned that without changes to other provisions (including those sought by the Appellant and the EDBs in their proceeding) the relief would fail to recognise and provide for the integration between infrastructure and land uses.

9. The EDBs agree to participate in mediation or other alternative dispute resolution of the proceedings.

S R Peirce

Solicitor for Aurora Energy, Network Waitaki and PowerNet
