

Kōrero gecko

Woodworthia "Otago/Southland large"

Otago
Regional
Council

Conservation status

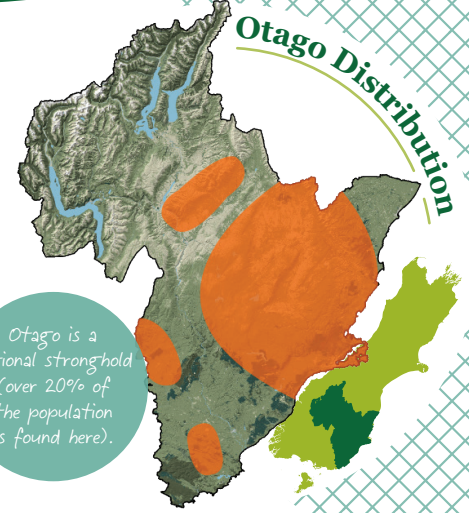

Regional | At Risk: Declining
National | At Risk: Declining

Main threats

Habitat change
(e.g. land development,
intensive farming and fire)

Introduced predators
(e.g. rodents, hedgehogs,
weasels, stoats,
ferrets and cats)

Identify me by my...

Brownish
upper surfaces

Toe pads that
are broadest
towards the ends

Body length: Up to 95 mm

Pale-grey
or brown underside,
often speckled

I inhabit...

Mostly rocky areas
(e.g. scree slopes, boulderfields,
and river edges or terraces)
but occasionally shrubland
and forest habitat.

I eat...

Mostly small invertebrates,
including insects and spiders

Possibly flower nectar
and native fruits
when available

1,300 m

0 m

I look similar to...

Kawarau gecko

Schist gecko

Southern Alps gecko
