

Raggedy Range gecko

Woodworthia "Raggedy Range"

Conservation status

Regional | Threatened: Vulnerable
National | Threatened: Vulnerable

Main threats

Habitat change
(e.g. land development,
intensive farming and fire)

Introduced predators
(e.g. rodents, hedgehogs,
weasels, stoats,
ferrets and cats)

Identify me by my...

Green, blue-green
or yellow-green eyes

Toe pads that
are broadest near
the tips

I inhabit...

Schist outcrops,
boulder piles and
small native shrubs.

I eat...

Mostly small invertebrates,
including insects and spiders

Possibly native fruits from shrubs
such as mingimingi (*Coprosma
propinqua*) when available

990 m

500 m

I look similar to...

Schist gecko

Southern Alps gecko
