# Resource Consent Application Form 14B

This application is made under Section 88 of the Resource Management Act 1991 (as amended)

Phone: 0800 474 082

Website: www.orc.govt.nz

## IMPORTANT NOTES TO THE APPLICANT

This form is to be used for small, or one-off gravel extraction applications such as those less than 500 cubic metres. Ensure that you complete this application Form 14B **and** Resource Consent Application Form 1 in **full**.

More significant gravel extraction applications (greater than 500 cubic metres) should be completed using Form 14A and Form 1 in full. If an application is completed on this form (Form 14B) and the effects of the proposal are deemed potentially more than minor further information may be requested, or you may be required to complete Form 14A.

If all the necessary information is not entered on the form or supplied with the application then Otago Regional Council **may return your application**, request further information, or in some circumstances may publicly notify your application. This will lead to delays in the processing of your application and may increase processing costs. This application form and supporting documents, when properly completed, should provide an adequate "Assessment of Effects on the Environment" (AEE). However, this can only be determined on a case-by-case basis.

For activities located within a flood protection or drainage scheme identified in ORC's Flood Protection Management Bylaw 2012, please obtain authorisation / bylaw approval from ORC's Engineering Team before applying for resource consent.

# PART A: Location and description of extraction location

1.	(a) Which river are you seeking to extra	ct gravel from:				
	Note: If you are seeking gravel from more to one, with site specific details.	han one river, please complete a s	eparate Form 14A in addition to this			
	<b>(b) Please provide GPS grid references from where you propose to extract gravel</b> (Note: All GPS locations to be provided in NZTM 2000 format):					
	Location 1:					
	Mid point grid reference:	Easting	Northing			
	Upstream grid reference:	Easting	Northing			
	Downstream grid reference:	Easting	Northing			

Location 2:			
Mid point grid re	eference:	Easting	Northing
Upstream grid re	eference:	Easting	Northing
Downstream gri	d reference:	Easting	Northing
Location 3:			
Mid point grid re	eference:	Easting	Northing
Upstream grid re	eference:	Easting	Northing
Downstream gri	d reference:	Easting	Northing
(c) Please desc	cribe the following asp	pects for each extraction location:	
Location 1:	Length		
	Width	m	
	Area	ha or m²	
	Depth	m	
Location 2:	Length	m	
	Width	<u>m</u>	
	Area	ha or m²	
	Depth	m	
Location 3:	Length	m	
	Width	m	
	Area	ha or m²	
	Depth	m	
This should include a of the beach, distance	description of the river e of proposed extraction ocation such as total siz	of the river and location from which environment at each location, name of from adjoining water level or height ab te. Please attach any maps/images as r	beach if known, total length and width ove low flow and any details about the
- r - r			

<u>PA</u>	ART B: Description of Proposed Extraction:						
2.	For what purpose is the gravel being extracted (e.g., commercial use):						
3.	Is this consent application seeking to replace an existing (current) consent?						
	□ No						
	☐ Yes: please give the following information						
	Consent Number:						
	Expiry date of consent:						
	If this consent application is granted, do you intend to:						
	☐ Extract gravel under the current consent until it expires (Section 124 continuation rights to be confirmed Council)	by					
	☐ Surrender the current consent and operate under the new consent as soon as possible						
4.	How much gravel do you propose to extract from each location?  Location 1m³ per year						
	Total volume sought from Location 1 over the term of the consent m³						
	Location 2m³ per year						
	Total volume sought from Location 2 over the term of the consent m <sup>3</sup>						
	Location 3m³ per year						
	Total volume sought from Location 3 over the term of the consent m <sup>3</sup>						

wnati	s the total volume of gravel you are seeking? m³				
	Over what period are you seeking to extract gravel?				
	days/weeks/months/years				
	otal volume proposed to be extracted will be extracted over multiple events, over what period will ndividual extraction event occur?				
	days/weeks				
Please	e describe the type of extraction method to be used:				
	Beach skimming				
	Instream works				
	Dry bed channelisation				
nitions					
h skimm	ning – Scraping material off the surface layer of the dry bed of the river				
eam wor	ks - extracting material from within the wet bed of the river				
ed chan	nelisation – cutting a channel into the dry bed adjacent to the main channel				
downs	ch extraction location please provide photos showing the gravel resource looking both up and stream. (Note: please indicate on each photo the date it was taken and the direction facing) A mage should also be provided showing where the photos were taken from.				
	Photos attached				
Is grav	vel washing proposed as part of the extraction? If yes please give details:				
	Over v  If the teach i  Please  Initions  She skimmer  Pear work  Pear work				

<sup>\*</sup> The washing of gravel refers to the removal of any excess sediment from the gravel. If this activity is undertaken in the river further consents to take and use water, discharge sediment to water or for any disturbance to the bed may be

required. (Note: A river bed is defined as the space of land over which the waters in the river cover at its fullest flow without overtopping its banks). Please contact Council to discuss further if unsure.

## 11. River Bed Access

(a) Please provide 2000 format):	e a grid reference	for all river access p	oints: (Note: All GPS location	ns to be provided in NZT
Grid reference:	Easting		Northing	
	Easting		Northing	
(b) Please provid	e site photograph	s (6"x4" minimum siz	e) of all proposed river bed	access points.
☐ Photographs	s attached to this a	pplication form		
is required to be for		re access through the r	ek rolled ramp, culvert, existing ver, please provide details an	
the placement of	instream structures (Discharge to Water	s. Where these may occ	ped of a river, that discharge s ur as a result of your extractio Works) and/or Form 37 (Culv	n activities, please also
	average width of pth of the river at	<del>-</del>	r at the access point. If acce	essing the wet bed also
Average width o	f dry bed (between	base of bank and edge	of the flowing channel) of the	riverm
Average width o	f wet bed (the width	n of the flowing channel	of the river	m
(e) Describe the	composition of th	ne bed material of the	dry bed of the river at the ac	cess point (e.g. Is the b
muddy, sandy,	stony etc.). If acce	essing the wet bed als	o describe its composition	at the access point.
muddy, sandy, 	stony etc.). If acce	essing the wet bed als	o describe its composition a	at the access point.

lo oto eksili	ng of grovel on th		lood plain (w	ithin 20 matus	a of the top of	the wiver bends
proposed a stockpiled' defined as t	ng of gravel on the tany time during the size of the side of the side of land with the gravel is of the side of gravel is of the side of gravel is of the side of	extraction? If y tockpiles and to thich waters of the	yes, please pro he intended do ne river cover a	ovide details, uration for any t its fullest flow	specifically who stockpiling.  without overto	nere gravel will (Note 1: A river oping its banks.

13. Describe in detail your proposed management plan and extraction methodology program (e.g., start from near the waters edge and move toward the banks, commencing in the north of the area, and moving southwards. You could discuss machinery types and or size to be used, how you propose to minimise any sediment from being discharged to water or avoid the disturbance of the bed of the river. If you have any means for dealing with any biosecurity matters such as didymo, any backfilling/ contouring/rehabilitation methods/plans, and your method of

Regional Plan: Air for Otago, and/or if the crushing or screening of gravel is at a rate exceeding 100 tonnes an hour, then consent to discharge dust to air may be required. For this please contact Council to discuss further. Alternatively, please complete Form 8, Discharge to Air.

14.

15.

16.	Please provide the details of the contractor (or other person) who will undertake the proposed extraction work.
	Contracting Company Name (if relevant):
	Contact Person:
	Contact Person's Phone Number: (office):
	(Mobile):
PAF	RT C: Assessment of Environmental Effects
spac	e: For some applicant's a number of the questions below may require answers/explanations that will take up more e than provided on this form. Please provide additional attachments, including written explanations, images, figures is required.
17.	(a) Please describe the river form at each extraction location: (e.g., braided, meandering or incised? Is there significant riverbank erosion?) How has the river changed over time in this location? If there has been gravel extraction there in the past, how has this affected the river? Please provide any supportive evidence as required – this could include the use of beach survey cross sections for each extraction location or any technical advice prepared by a suitably qualified and experience person.
(b)	How will the proposed extraction affect river form in this location? (e.g., erosion potential, aggradation/degradation effects)? Will there be any change in effects on the river during flood of low flow events as a result of the extraction?

map	e: Council holds existing channel morphology and sediment analysis reports as well as a number of images which may be of use here. Please contact Council's Environmental Engineering and Natural Hazards ired).
	cribe whether there are any adverse effects that may be caused by machinery access to the bed r and the way, in which these adverse effects are to be avoided, remedied and mitigated:
rem	at structures are located downstream of the site? What is the distance to the nearest structure? Voval of gravel directly or indirectly affect any downstream structure such as through alterations for altering any flow characteristics?

	extraction affect this and/or any other downstream gravel takes?
21.	Does the area from which you propose to extract gravel have any of the following values associated with
	<ul> <li>□ Native fish</li> <li>□ Sports fish</li> <li>□ Aquatic habitat</li> <li>□ Bird life</li> </ul>
	<ul> <li>□ Water supply</li> <li>□ Visual amenity</li> <li>□ Recreational amenity (e.g., fishing, walking, swimming, kayaking etc)</li> <li>□ Heritage values</li> <li>□ Other (describe):</li> </ul>
	ase refer to Schedule 1 of the Regional Plan: Water or Council's Resource Science Unit to assist with answering the stion. They may have information on file.
effe metl asse	e location has any of the above values, please describe how you intend to avoid, remedy or mitigate adverted of the proposed gravel extraction on these values: (Note: For applications to take gravel via instream hods a more detailed ecological assessment will be required. Please attach any ecological information/reports or essments completed which identify the plant, fish, and invertebrate species present and details of the potential cts the disturbance and gravel extraction may have on the site.
	may wish to undertake some pre-application consultation with a suitably qualified, independent ecologist, erienced in river ecological management about the proposal).

	e proposed extraction have any river management benefits? If yes, please describe what the
<b>Jene</b> ti	ts are and how they have been determined?
_	
<b>Are yo</b> ip rap	ou proposing any other works as well and removing gravel? (for example, riparian planting, place material or other instream works)
وعوا	e comment on any consultation undertaken with those persons/parties who may be affected b
	sal to extract gravel:

25.	Please provide any written approvals obtained:
	Written approvals attached on Form 1
26.	In order to submit a complete application, have you remembered to?
	☐ Fully completed this application form and Form 1
	☐ Attached an Assessment of Environmental Effects? (if required)
	☐ Attached the Policy Sheet, or an assessment against the relevant policy documents
	☐ Attached maps, technical drawings and photographs as appropriate
	☐ Attached technical reports appropriate
	☐ Attached a Certificate of Title for the site that is less than 3 months old
	☐ Attached any written approvals
	☐ Paid your deposit?

#### **Additional Notes to Applicant:**

- (a) Obtaining permission for access to the extraction area is the applicant's responsibility. The granting of a consent to extract the gravel does not imply permission to access the land.
- (b) Land use consents to extract gravel from river beds confer no rights to exclusively occupy any land either on or outside of the river bed.
- (c) The applicant is to be aware that neighbours might be affected by noise or dust from the gravel extraction and screening work. Please consult the Territorial Local Authority about noise limits and related time restrictions. The granting of a consent to extract gravel does not allow for any objectionable noise or dust to travel beyond the site.
- (d) Under Section 36 of the Resource Management Act 1991 and the Local Government Act 2002, the consent holder must pay an inspection and management fee to the Consent Authority.

If you have any queries relating to information requirements, please contact the Otago Regional Council Offices:
