1	Colin Venables							Submission is from Colin and Carol Venables. Submission relates to odour effects and seeks a substantial improvement in odour management at the landfill. Notes that they have experienced multiple instances of foul odour over several years and states that these have been reported. Specifically requests that odour is minimised such that there is no odour beyond the site boundary. If this is achieved, the submitter is neutral with respect to the proposal for continued operation. Takes the position that if odour cannot be constrained to within the site boundaries then the landfill should close.	28/11/2024	Yes	Neutral
2	Colin Leslie Weatherall		1118 Brighton Road	Brighton	Dunedin	9035	NZ	Best use of location land and short term, supports as a service/processing centre. Concerned re impact of odour, noise, leachate control now and future Closure of landfill and future use for city activity. Reserves final opinion until s42A and other hearing documentation is available.	11/12/2024	Yes	Support
3	Aukaha		P O Box 446	Dunedin Central	Dunedin	9054	NZ	Te Runanga o Otakou C/o Aukaha Te Runanga o Otakou accepts need for continued waste disposal until Smooth Hill Landfill is ready to accept waste and the long term ongoing requirement to manage surface water runoff, leachate and landfill gas once the GIL closes Requests that the applicant should in collaboration with mana whenua; Investigate migration of leachate on Kaikara Steam and	13/12/2024	Yes	Neutral

								Estuary Investigate cumulative impacts of leachate on Kaikarae Stream and Estuary; and develop measures to avoid or mitigate impacts of leachate on the environment			
4	Otago Fish and Game Council		PO Box 76		Dunedin	9054	NZ	Requests clarification of uncertainties of assessments re the effectiveness of leachate collection trench. Monitoring protocol include enhanced monitoring measures, requests explicit consent conditions re further ecological assessments to address potential adverse impacts on ecological health. Condition to lower the leachate head. The design of the new leachate collection trench incorporates resilience against seismic events along with modifications an monitoring procedures for existing infrastructure to mitigate potential adverse effects. Implementation of adaptive management be contingent upon meeting specific principles to ensure adequate evidence monitoring are in place	13/12/2024	Yes	Neutral
